

Davis Conference Center

Davis Conference Center
Layton, Utah
43,000 Square Feet
Completed in 2004

The Davis Conference Center was designed to provide state-of-the-art convention and reception spaces to the communities of Northern Utah. The center houses a grand ballroom with movable partitions that can be used to divide the space into eight smaller spaces. The facility also houses smaller meeting rooms and receptions areas connected by a steel framed concourse that runs the length of the facility and terminates at a steel and glass turret. Another unique feature of the facility are the 70' tall freestanding steel framed towers at the entrance.
