

## North Ogden Elementary

**North Ogden Elementary**  
**North Ogden, Utah**  
**80,300 square feet**  
**Completed in August 2009**

*2009 UMC Excellence in Masonry Design Winner*

*Excellence  
in Masonry  
Design Awards*

The school services elementary school students from grades K through 6. Each grade level is housed on a separate floor in one of the three main classroom pods. The kindergarten is located in a separate single story wing of the building. In each of the main classroom pods there are activity spaces in the central corridor for additional learning opportunities. Each of the classroom pods links to the central portion of the building which houses additional resource rooms, computer labs, a media center, administrative offices, kitchen, dining room, gymnasium, and a stage that opens to the gymnasium and dining room areas.

The structure stands as an example of both aesthetic form and natural function. The robust masonry walls that adorn the entire exterior surface of the building are very inviting and give the building a feeling of solidarity, commitment, longevity, and security to the students that will come to receive an education.
